

Security Manager

All you need to reduce the annual security operating costs in your buildings, and improve performance - from a single source

- Ideal for new buildings
- Perfect and unique in existing buildings with legacy systems.

INTEGRATE NEW AND /OR LEGACY SYSTEMS

Presence
Detector

Surveillance
Cameras

Access
Control

Lighting

Fire Alarm

Access Control
 Asset Tracking
 Automated Number Plate Recognition
 Cameras Analogue & Digital
 Car Park Entry / Exit Barriers
 CDC Integra Operating System
 CO Monitoring & Extract

 Paging
 Panic Alarms
 People Counting
 Perimeter Intruder Detection
 Power over Ethernet
 Presence Detection
 Public Address
 Queue Management
 Remote Management
 RFID Tagging
 Seismic Detection
 Smart Card
 Standby Generators
 Surveillance Cameras
 Tamper Detection
 Telephony
 Under Vehicle Scanning
 UPS Uninterrupted Power Supply
 VESDA
 Voice Evacuation

Security Manager – ALL YOU NEED TO KNOW ABOUT THE SECURITY IN YOUR BUILDING(S) - IN ONE PLACE...

Delivers to Estates Directors and their security managers all the information they need to monitor, maintain and improve all security operations, systems and costs.

From a single viewer managers, engineers and operators can drill down to their level of detail, matched to their access clearance, necessary for operations.

Friendly graphical displays provide a common interface to all information and key performance indicators can be summarised and automatically reported for you.

Real time updates are provided and a year's history captured in a SQL database for customised reports and for occasional interrogation.

Maintenance parameters, events and alarms can be highlighted to engineering and prioritised by technical or business impact.

You can also link information on multiple systems to check and report on Service Level Agreements and Key Performance Indicators.

Trends are captured and analytic tools provided to enable automated cause and effect control strategies. Rather than tell you what has happened Security Manager can help you discover why, and even predict what may happen soon.

REQUIREMENTS

All the necessary software ready to run on dual server platforms, with SQL database, within an annual CDC license. A one-off charge for design and installation of necessary, devices, detectors, sensors, meters, interfaces, hardware and wiring is added depending on the scale of facility.

CDC Security Manager is licensed with a basic VIEW level of functionality for all connected systems. There is an option to upgrade to the ANALYTICS level licence giving access to the CDC Analytics Service tools. A further option to upgrade to a CONTROL level license allows access to configuring of the CDC Rules Based Logic Engine.

VIEW

- Alarm Trapping and Handling for Systems
- Complaints Logging
- Pre-Configured Graphics
- Remote Management
- SQL Audit Trail First Year
- Systems Validation "Heartbeat"

ANALYTICS = VIEW +

- Analytics for Systems
- Analytics Budget / Target Comparisons
- Automated Log Book
- Availability Reports for Systems
- Bespoke Graphics Visualisation
- Complaints Reports
- Key Performance Indicator Monitoring
- Performance Dashboards

CONTROL = VIEW + ANALYTICS +

- Automated Alarm Handling - Systems
- Automated Cause & Effect Control Strategies
- Call Out Maintenance Automated Cause & Effect
- Call Out Maintenance Contracts
- Performance Based Maintenance Contracts
- Preventative Maintenance Automated Cause & Effect
- Preventative Maintenance Contracts
